Summary

I am a seasoned frontend developer with a rich 2-years background in crafting and refining frontend architecture. My journey is marked by a relentless pursuit of solving complex challenges and delivering solutions that redefine efficiency. I excel in optimizing frontend performance, creating seamless user experiences that leave a lasting impact.

My secret weapons are my exceptional communication skills and innate ability to collaborate seamlessly, fostering an environment where teamwork thrives and projects soar to success. I have a knack for translating intricate technical details into clear and concise documentation, ensuring that development processes flow effortlessly.

I stand ready to unleash my expertise in crafting awe-inspiring user interfaces and elevating the overall frontend functionality to new heights of excellence.

SKILLS

HTML5 | CSS3 | JavaScript | React | Responsive design | Git | GitHub | Browser compatibility |
Webpack | Gulp | RESTful APIs | AJAX | SEO principles | Frontend testing (Jest) |
Performance optimization | Accessibility (WCAG) | Bootstrap | Tailwind CSS | Babel |
TypeScript | Collaboration | Problem-solving | Analytical thinking | Continuous learning |
MongoDB | Express | Node.js | web Socket

Professional Experience

Full stack Developer (MERN stack)

IZONE5 NIGERIA LTD

01/2024 - present

- Successfully completed multiple projects within allocated timeframes and budget constraints, enhancing the development teams and company's achievements.
- Collaborated effectively with UI/UX designers to translate wireframes and mockups into polished, functional web pages.

- Conducted comprehensive cross-browser and device testing to guarantee seamless functionality and visual consistency across various platforms.
