PROFESSIONAL SUMMARY

Frontend and mobile developer with 3+ years of experience building React, Next.js and React Native apps for clients in Nigeria, the UK and India. Recently shipped an Expo app to Google Play with end-to-end push notifications and deep linking, and refactored a legacy web codebase to cut page load times by about 3 seconds. Comfortable turning Figma designs into responsive, accessible interfaces, debugging iOS and Android build issues, and working closely with designers and backend engineers in remote teams.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, TanStack Query, TailwindCSS, responsive & mobile-first design
Mobile: React Native, Expo, EAS Build, Expo Notifications, push notifications (FCM/APNs), deep linking, Google Play release
Design-to-Code: Figma/wireframes to production UI, cross-browser & cross-device testing, accessibility (WCAG-aware), SEO-friendly markup
Backend & Tools: Node.js, MongoDB, Redis, REST APIs, Git, CI/CD pipelines, Vite/Webpack, Ethers.js, Cloudinary
Practices: Agile, code reviews, testing, performance optimization, mentoring

PROFESSIONAL EXPERIENCE

Mobile Engineer | Zysk Group Limited — Abuja, Nigeria (Remote) *Dec 2025 – Present*

- Built and launched the company's React Native/Expo app, taking it through EAS Build to a Google Play release; 100+ downloads in the first month.
- Built push notifications end to end: Expo Notifications, FCM/APNs credentials in EAS, backend sending via expo-server-sdk, plus in-app listeners and deep-link handling.
- Fixed an iOS crash caused by a nil Fabric component registration, and resolved Android build failures from Expo SDK mismatches and peer-dependency conflicts.
- Integrated Cloudinary for secure KYC document upload and delivery; fixed TanStack Query caching bugs in the attendance-tracking feature.

Frontend Developer | Sprinble — Lagos, Nigeria *Dec 2024 – Jun 2025*

- Refactored a legacy codebase to modern React patterns, cutting page load times by about 3 seconds.
- Built and maintained responsive web interfaces in close collaboration with designers and backend engineers.
- Fixed recurring production bugs and documented maintenance steps, reducing support tickets by about 35%.
- Automated build and deployment workflows, roughly halving deployment time.

Frontend Developer (Contract) | Frexiq — Lagos, Nigeria *Jun 2024 – Dec 2024*

- Built a vendor dashboard handling 500+ daily bookings, with responsive layouts across desktop, tablet and mobile.
- Converted Figma designs into pixel-perfect, responsive React pages, tested across browsers and devices.
- Integrated REST APIs for the daily booking and transaction flows.
- Mentored engineers on React best practices and helped shorten code review cycles.

Full-Stack Engineer (Contract) | Izone5 Nig Ltd — Port Harcourt, Nigeria *Jan 2024 – Oct 2024*

- Built the front end of a financial dashboard for transaction monitoring, with full CRUD operations.
- Developed the UI for a real-time chat feature supporting 200+ concurrent users.
- Worked with the backend team on an API layer for a microservices architecture, improving data consistency between services.
- Introduced shared, modular UI components that made the codebase easier to maintain and extend.

Frontend Developer | Digiscript — United Kingdom *Jan 2021 – Jan 2022*

- Turned UI/UX wireframes into responsive web applications, working closely with designers and backend developers.
- Ran cross-browser and cross-device testing and fixed browser-specific layout and behaviour bugs.
- Delivered high-priority client projects on tight deadlines.
- Adopted modern frontend tooling to speed up day-to-day development.

EDUCATION

Bachelor of Technology, Soil Science and Technology *2017 – 2023*
Federal University of Technology, Owerri, Imo State, Nigeria

Languages: English (Native) | **Soft skills:** technical leadership, cross-functional collaboration, clear written communication
